Assignment Title: Chapter 14 & 15 Assignment: Node API Web Service

Overall, I think I did well on this assignment. I did have to use a lot of online resources, but since this was the first time I really played around with it, it was actually a lot more helpful for me to learn as I was going.

I think if I did this assignment again, and I had more time, I'd research more beforehand so that I could do the assignment without using as many online resources during the process of completing it.
